CAREER OBJECTIVE

To pursue a challenging career with a forward-thinking organization, staying abreast of emerging trends and contributing proactively to organizational growth while excelling in a highly competitive environment.

EDUCATION

S.A.ENGINEERING COLLEGE

B.E CSE(CyberSecurity) 2023 - Ongoing

CGPA : 8.64 till 6th Sem

RAMAKRISHNA MATRIC HR SEC SCHOOL

Higher Secondary 2022 - 2023

Percentage : 82.3

CERTIFICATIONS

- SAP BTP Administrator - SAP
- Pre Security, Cyber Security 101, Web Fundamentals, Jr Penetration Tester, CompTIA Pentest+, SOC Level 1, SOC Level 2, Security Engineer, Red Teaming, Web Application Pentesting - Tryhackme
- CyberSecurity Professional - Google
- Certified Red Team Operations Management (CRTOM) - Red Team Leaders
- CAPIE - Certified API Hacking Expert - TheXSSRat
- Offensive Security Pathway, Ethical Hacking & Pentest Mastery, Mastering Network Security - Udemy
- Ethical Hacker - CISCO
- Networking - Infosys Springboard

SKILLS

- Penetration Testing & VAPT
- Web Application Security
- Malware Analysis & Digital Forensics
- SIEM & Incident Response
- Network Security & Zero Trust
- Cloud Security

PROGRAMMING

- Python
- Java
- C,C++

EXPERIENCE

Cyber Crime Wing - Intern (Onsite)

Cyber Security Intern | Jun 01, 2026 – Jul 31, 2026

• Developed AI-powered malware analysis platform for static, dynamic, and behavioral threat detection.

Deltaware Software Private Limited - Intern

Penetration Tester | Mar 10, 2026 – May 10, 2026

• Gaining hands-on experience in penetration testing, vulnerability assessment, and ethical hacking through practical cybersecurity tasks.

ApexPlanet Software Private Limited - Intern

Cyber Security & Ethical Hacking | Dec 11 2025 – Feb 8 2026

• Gaining hands-on experience in penetration testing, vulnerability assessment, and system hardening through structured cybersecurity lab tasks.

Edunet Foundation - Intern

Cybersecurity with Gen AI | Dec 9, 2025 - Jan 6, 2026

• Building an AI-driven intrusion detection system to analyze network traffic and identify potential cyber threats in real time.

Uptoskills – Intern

Cyber Security | Oct 21, 2025 – Jan 21, 2026

• Developing practical experience in cybersecurity analysis and threat mitigation.

PROJECTS

- **Enterprise Android Malware Analysis Platform:** Static/dynamic APK analysis with MobSF, Frida, YARA detection, AI threat summarization, and a web dashboard.
- **Low-Observable C2 Framework:** Developed a stealth-based command-and-control simulation system for secure remote communication, persistence, and phishing-based delivery in cybersecurity testing.
- **Zero Trust Network Access (ZTNA):** Flask Web Application: Flask-based system implementing identity-based authentication and authorization to enforce secure, application-level access following the Zero Trust model.
- **Cyber Fraud Detection System: A** Flask-based web application using NLP and machine learning to classify SMS, email, and chat messages as fraudulent, suspicious, or safe.
- **Web Application Penetration Testing Tool: A** Flask-based tool that performs automated security testing to identify common vulnerabilities in web applications.
